

First off thank you for looking into the OM Brain Expert by OM Brain.

Description

I developed this Expert Advisor to mimic my analysis style when I trade; Considering that my strategy is based on Price Action (Patterns), Liquidity and Institution (Smart Money).

The OM Brain Expert first identifies Price Action Patterns in the market, patterns such as Bearish/Bullish Engulfing, Morning & Evening Star. These patterns will be highlighted by boxes Pink for Bullish Engulfing/Morning Star and Blue for Bearish Engulfing and Evening Star. *Its important to note that the calculations used does not accurately get all patterns and can (in most cases) false identify. However, the Liquidity produced is still true regardless.*

After the Patterns are Produced, Liquidity is now Identified and showed as a red box extending to the current candle waiting to be hit. When Liquidity is hit, a new box shows that is now yellow.

When a Pattern shows after Liquidity is hit then an Alert, Print and Push Notification is sent out.

Settings

Make Sure that both is activated

OM Brain (MT5)

Common Inputs	
Variable	Value
ab TimeFrame	15M
1/2 LiquidityRange	0.00002
01 Number of candles to scan	100

Expert - OM Brain (MT4)

About Common Inputs	
Variable	Value
ab TimeFrame	5M
1/2 LiquidityRange	3.0
123 Window	100

Also make sure that you adjust the Timeframe Value relative to the time frame being used.

Liquidity Range is the size of the Liquidity Line Boxes, you'd want it to be small.

Best of Luck Trading, there might be times when I do update both so look out.
